

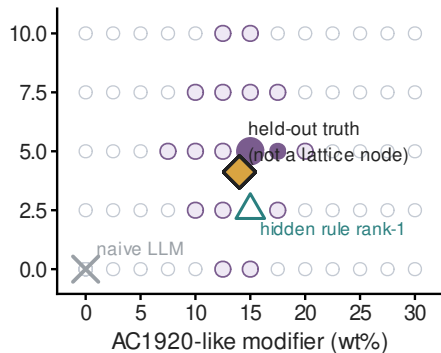

Figure 5 | Outcome-blind Agent decisions concentrate in the experimentally supported region

TK100-like modifier (wt%)

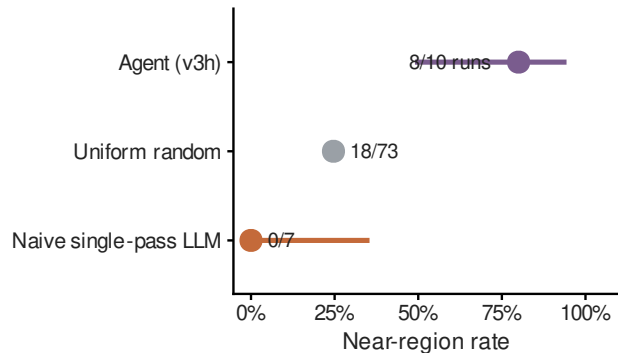

A Outcome-blind 73-node candidate lattice

18/73 nodes are in the predeclared near region ($L1 \leq 7.5$ pp)

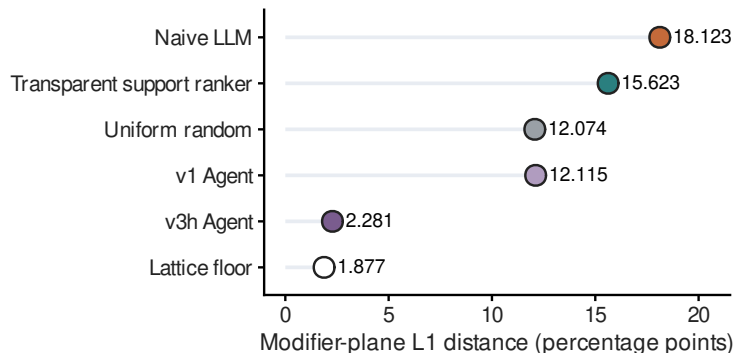

B Near-region recovery

Run-level recovery: Agent made 8 near-region c

C Distance to held-out formulation

Mean modifier-plane L1 distance for stochastic arms; exact values for deterministic arms

D Attribution of improvement

Before single-tasking; before decomposition; descriptive ra
