Figure 1c is a dot plot showing the proportion of matched-window 120 °C hold selected for three conditions: rule-complete, VOI withheld, and order inverted. The y-axis represents the proportion selected, ranging from 0 to 1.0. The x-axis labels are rule-complete, VOI withheld, and order inverted. The data points are shown as dots with error bars representing the standard error of the mean. The sample sizes (n) are indicated next to each dot.

Condition	Proportion Selected (Mean)	Sample Size (n)
rule-complete	1.0	10/10
VOI withheld	1.0	5/5
order inverted	~0.7	7/10

order-inverted arm, 10 runs — three separate outcomes counted over the same runs; each segment is one run
