

a**b**

dimethyl 4,4'-methylenediphenyl dicarbamate — the MDI unit closed by the urethane linkage

c

model geometry

N···O	2.92 Å
N-H···O	164°
closest heavy-heavy	3.20 Å

Single-unit geometry MMFF94. The stack is a constructed model of the association, not a measured structure — this polymer is amorphous and the repository holds no structure.
